## Identifying Quality Attributes

### Exercise

#### ■ Identify 3 QAs for each system

	Avail	Security	Perf	Inter	Mod	Test	Use
Enterprise inventory control							
Smart phone map app							
Video game							
Social network site							

#### ■ Specify the most important QA for each system using scenario

73

1. Identify 3 QAs for each system.
  - a. Enterprise inventory control: Availability, Security, Integration
  - b. Smart phone map app: Availability, Performance, Usability
  - c. Video game: Performance, Testability, Usability
  - d. Social network site: Availability, Security, Performance
2. Most importance QA for each system
  - a. Enterprise inventory control: Security is the most importance as the information of inventory should not be known by other companies or outsiders.
  - b. Smart phone map app: Availability is the most importance as the app should be available all the time for the most effective function.
  - c. Video game: Performance is the most importance as latency will cause the user experience to drown.
  - d. Social network site: Security is the most important to ensure the security of the user's account.
